

# Lecorpio Invention Disclosure Management

## Key Benefits

### Reduce cycle time

- Automated workflows reduce innovation and time-to-file cycle time.

### Improve performance

- Streamline frequent administrative processes with rapid speed-to-approval.

### Boost inventor engagement and satisfaction

- Make the process easier for the inventor to submit new ideas.
- Empower inventors with advanced self-service capabilities to view the real-time status of their submissions and awards.

### Understand productivity and strategic alignment

- Gain real-time analytical insight into the productivity and performance of the entire process to improve decision making.
- Increase innovation alignment with strategic goals.

### Reduce risk

- Perform most if not all communication within Lecorpio, streamlining communication and avoiding risky email threads.

## Simplify the invention disclosure process while enhancing inventor engagement

Lecorpio Invention Disclosure Management simplifies the invention disclosure management process with pre-packaged, but configurable workflows and forms. Each participant is notified when they need to perform a task, and alarms are triggered if delays occur. With end-to-end management of and visibility into the entire disclosure management process, your organization can:

- Improve strategic planning:** Gain real-time analytical insights that improve decision-making for solicitations and development of new technology and intellectual property.
- Reduce time-to-approval:** Improve performance by automating administrative workflows.
- Empower inventors:** Provide advanced portal-based self-service capabilities and real-time visibility into the status of submissions and awards.

Lecorpio offers a modular, enterprise-class solution that is purpose-built to manage your entire Intellectual Property (IP) supply chain using best-practice workflows and benchmarking.

Our multilingual, hosted software is engineered for the Web, and comes with out-of-the box functionality to speed implementation, increase collaboration, and accelerate time-to-value.

## Key Features

### Self-service for inventors and reviewers

- Reduce time consuming inventor 'hand-holding' and communication throughout the process.
- Inventors can use any browser to submit their ideas and track the status of their submissions.
- Patent committee members, evaluators, and subject matter experts can provide ratings, recommendations and decisions either virtually to speed the process, or in a more traditional 'in-person' meeting environment.

### Automated, workflow driven reviews and approvals

- Reduce time-to-file through just-in-time driven workflow processes and analytics.
- The review process is automated based on pre-defined business rules, such as business units, technology areas, locations or any combination thereof. The system automatically pushes the right information to the right people in the fastest time.

### Automated inventor awards calculation

- Lecorpio's business rules engine calculates inventor awards automatically based on your specific business rules.
- Inventors can view the status of their awards in real time.

## Key Features (cont.)

### Auditing

- Complete audit trails document each and every change made by inventors and reviewers.
- Eliminate risky and dead-end email trails from the process by associating all correspondences to the record within the Lecorpio system.

### Configurability

- Tailor the software to suit the way your organization works with zero code changes.
- Handle diverse requirements by defining your own preferences and task parameters.

### Robust analytics

- Uncover the factors inhibiting innovation speed, quality and time to market.
- Out of the box reports track decision speed, innovation and legal costs, alignment with business objectives with over 100 KPI analytics.

### Integration with other data sources and enterprise systems

- Reduce the user management time and naming convention duplication through the import HR data, including inventor addresses and employment status.

---

## About Lecorpio

Founded in 2005, Lecorpio is headquartered in Fremont, CA. The company currently counts 5 of the top 20 US patent filers as clients, and 8 of the top 10 IP law firms as users. With a focus on providing the highest levels of security, service and support, Lecorpio was named Market Leader by Hyperion Research.
