

# Lecorpio Patent Management

## Key Benefits

### Higher customer satisfaction

- Our mission is to transform the IP industry through innovative software services and honest delivery on our client's needs. We are achieving this goal one customer at a time.

### Less work around work

- Reduce or eliminate painful, low-value, busy work through automation, and managed workflow, with easy access to critical information.
- Embedded, form-based workflows manage prosecution process efficiently.
- Streamline frequent administrative processes with rapid, automated workflows.

### Make the software your own

- Lecorpio's advanced software enables userbased configuration so our solution supports your business as it evolves over time.
- Change and adjust without preventing easy upgrades.

**Enable the entire IP team to access, manage and prosecute patents in the manner most efficient and beneficial to them and your organization – today, tomorrow, and even ten years from now.**

Lecorpio Patent Management helps IP departments, law firms, inventors and stakeholders unify IP operations for greater efficiency and collaboration across varying roles, needs, and end results, leading to higher quality IP at a lower risk and cost.

- Organize patent case information into electronic folders similar to paper file folders. All participants in the process are provided granular access to data based on their role and need.
- Drive structure and efficiency within your patent development lifecycle through form-based workflow systems that were built into the application from day one – not added later as a trendy afterthought.
- Reduce timeframe, errors, and busy work by automating docketing; draft submission, review and approval processes; divisional, continuation and CIP approvals; international filing review and approval processes; and annuity review and approval processes.
- Increase patent visibility, management and control through comprehensive, and easy to use dashboards, reports, analytics and in-line 'at the decision point' insights which combine data not available in any other patent management system.

Lecorpio offers a flexible and modular solution that is purpose-built by Silicon Valley-based software professionals to manage your entire Intellectual Property (IP) supply chain using best practice workflows and benchmarking.

Our multilingual, hosted software comes with out-of-the box functionality to speed implementation, provide a single IP hub for internal and external stakeholders, and accelerate time-to-value.

It can be used as a stand alone module, or integrated with our entire family of IP products and services.

## Key Benefits (cont.)

### Enhanced visibility, management and control

- Comprehensive reporting and analytics, with easy to build searches and reports.
- Share knowledge on intellectual assets across your extended enterprise.
- Real-time analytical insight of productivity and performance of internal teams and law firms.
- Graphical analysis helps you understand gaps in innovation, competitive intelligence and opportunities for inlicense and out-license
- Manage budgets and monitor unapproved extensions on filings, gaps between estimates and actuals

## Key Features

### Centralized repository

- Patent case information is centrally organized into easily searchable electronic case files.
- Correspondence and emails between attorneys, inventors and other case participants are stored in the electronic case files to provide a single source of all relevant information.
- All document and media types can be stored automatically or using drag and drop, and can be searched easily.

### Prosecution workflow management

- Prosecution actions include pre-built templates and workflow for each action, including specific form-based country applications.
- Workflow can be used out of the box, or configured specifically to an organization's internal needs – by the user.

### Docketing management and PTO integration

- USPTO correspondences can be enabled to automatically kick off docketing events and associated workflow, while filing the correspondence into the system record.
- Docketing management is fully integrated with case files, docketing is automatically associated with cases, and the user can instantly link from docket to the case file, or from case file to docket.
- The software provides quarterly-updated patent country rules, which can be reviewed and configured to your needs at any time.
- More PTO integration and automated services to come.

### Robust reports and analytics

- Create, manage and analyze all aspects of your patents and portfolio through easy to use, out of the box and user configurable reports.
- Provide executive dashboard reports and analytics for faster, easier access to critical information.
- Analyze and compare data and processes by time, cost and other factors unavailable in other systems due to Lecorpio's unique workflow and Spend Management capabilities.
- Cluster data by technology areas, product groups and other tags that are user-configurable to create heat maps, and other critical strategic reports.

### Annuity review and approvals

- Choose the best annuity provider for you now and in the future – Lecorpio integrates with all annuity providers and it annuity service agnostic.
- Make decisions on individual patents right from the record or pre-set the renewal strategy across groups of patents.
- Prune or renew patents based on analytics and workflow-based review.
- Reference and Information Disclosure Statement (IDS) management
- Provides for uploading references/citations, linking references to multiple patent applications and patents and workflow to manage cross-referencing review and approval processes.
- Generates IDS forms and keeps track of updates made on references for auditing purposes.

## Key Benefits (cont.)

### Feel confident

- Lecorpio supports the world's most innovative companies including 5 of the top 20 most active patent filers in the US.
- Rated the number one IP management system in Hyperion Research Groups most recent industry survey.
- Lecorpio has been managing country rules, dockets, and IP assets for over eight years. Just ask us about our customers and references.
- At Lecorpio, security is job one. Our product architecture provides for single tenant, single sign-on, encryption at rest, and role-based user management among many other security features

## Spend management

- When combined with our Spend Management module, provides automated and comprehensive budget, estimates and accrual management for each task performed by law firms.
- Each estimate provided by law firms goes through a review and approval process. This provides a complete and up-to-date budget situation.

## Configurability

- Lecorpio was developed by professional software developers for a broad range of users and industries. No other system can conform to your processes as precisely and easily, today and tomorrow, as Lecorpio. So the software will work the way you do rather than making you conform to the software.
- Users can make necessary changes, not expensive vendor consultants or IT professionals.
- Changes are made at the application layer, which means upgrades are no longer the issue they once were. Stay updated with the latest software versions easily and without the hard work and complications.
- Add, rename, or completely change fields, products, classifications, workflows, reports, screen layouts, and more.

## About Lecorpio

Founded in 2005, Lecorpio is headquartered in Fremont, CA. The company currently counts 5 of the top 20 US patent filers as clients, and 8 of the top 10 IP law firms as users. With a focus on providing the highest levels of security, service and support, Lecorpio was named Market Leader by Hyperion Research.
